EXPERIENCE

Open Mind Solutions | **Web Developer** | December 2019 – December 2020

I started working around the end of December as a web developer for Open Mind Solutions. The company is based in Skopje, North Macedonia and deals in data storage and management. The company also develops web-based software for various national medium to large enterprises and institutes. Some of our key clients include EVN and Telekom among others. Working in this company has been a new challenge to me, as it differs greatly from what I've been working until now. I'm tasked with processing and structuring raw data using MySQL and PL/MySQL. I wanted to branch out and expand my knowledge and apply it into new fields, that's why shifting to this position was an ideal opportunity for me.

Snowball Games | **Software Developer** | May 2018 – September 2019

I worked as a gaming developer for Snowball Games for about a year and a half. During my tenure we developed one commercially large game "Yatzy Dice Clash" and another two mini games "Pocket Rocket" and "Cosmic Rush". With "Yatzy Dice Clash" I was tasked to create pop ups, tool tips, particle effects, fixing bugs, audio adjustments among many various small features that helped fine tune the game. In the other two games I was given more freedom to develop features from anew. I was given raw versions of both mini games, meaning they only had the gaming mechanics in place and was tasked with giving them a design and look. I created the UI for both games, adjusted the games difficulty levels, created ads, made visual and audio adjustments using Unity, Microsoft Visual Studio Code, C# and Github. These projects gave me a good opportunity to get familiar with several different softwares that undoubtedly will come in hand in future projects.

EDUCATION

Bachelor of Software Engineering and Information Systems | Faculty of Computer Science and Engineering | University of Ss. Cyril and Methodius | Skopje | 2013 –

I've been studying for this programme since 2013. I chose this programme since I had an interest in software engineering from an early age. The subjects offered by the programme have been satisfyingly challenging so far and have motivated me to expand my interests in different tech related fields. The university is also the top ranked in the country and I've felt it has offered a high standard of teaching. I've also been working while studying for my degree which has come quite useful and beneficial in both my career and education. I expect to finish my studies by the end of this year.

SKILLS

- C# – Intermediate to Adept
- Javascript (ReactJS) Beginner to Intermediates
- C++ – Beginner to Intermediates
- Github – Adept knowledge
- Unity – Intermediate to Adept
- Microsoft Visual Studio Code – Intermediate to Adept
- MySQL – Beginner to Intermediate
- Fluent in *English, Albanian and Macedonian*, Intermediate understanding of *Turkish*.
- Team-player
- Goal-oriented
- Punctual
- Hard-working
